

# **Download Current Research In Ophthalmic Electron Microscopy Transactions Of The 5th Annual Meeting Of The Eur**

Essen in spring 1972 and founded ECOFS, the European Club for Ophthalmic Fine Structure. Since its inauguration the Club has attracted the interest of more and more scientists engaged in the electron microscopic investigation of the eye. Once each year the members of the association and invited guests take part in a very active scientific meeting. Add tags for "Current research in ophthalmic electron microscopy : (transactions of the 5th annual meeting of the European club for ophthalmic fine structure in Zurich, Switzerland, March 25 and 26, 1977)".
