The current view of brain organization supports the notion that there is a considerable degree of functional specialization and that many regions can be conceptualized as either 'affective' or ...Cognition and Cognitive Neuroscience. The Cognition and Cognitive Neuroscience (CCN) program marshals the talents of over 30 faculty in Psychological Sciences at Vanderbilt to examine fundamental problems in perception, attention, memory, thinking, and problem solving. This paper focuses on distinguishing the aspects of emotions that are more universal from those that are more culture-specific. By testing the extent to which the three emotion domains in the cascading model of emotional intelligence (emotion perception, emotion understanding, and emotion regulation) are universal versus culture-specific, the researchers examined the hypotheses that emotion ...Cognition is "the mental action or process of acquiring knowledge and understanding through thought, experience, and the senses". It encompasses many aspects of intellectual functions and processes such as attention, the formation of knowledge, memory and working memory, judgment and evaluation, reasoning and "computation", problem solving and decision making, comprehension and production of ... - Handbook Of Cognition And Emotion
