How to Watch Wildlife - Steps Decide where you're going to observe wildlife. Research the wildlife in your chosen location. Prepare for your expedition or outing. Blend in with your surroundings if required. Be still and wait. Approach wildlife carefully. Use your ears. Figure out what ...How to Watch Wildlife. Observing wildlife in nature is a rewarding experience that requires little more than patience. However, investing in (or borrowing) the right equipment and following a few key tips will help make your wildlife watching excursion as successful as it can be. By entering your details, you are agreeing to Discover Wildlife terms and conditions. You can unsubscribe at any time. Watch Wildlife. What to Watch... April: April is a great time to advantage of the bare-limbed trees to go out bird watching because in a few short weeks, it will be difficult to spot many of those songsters in the trees! Many migrating birds begin showing up in Vermont in April, either to stay here and nest for the summer, or just passing ... - How To Watch Wildlife
