

Download Information Security Policies Made Easy

Version 9

Information security, sometimes shortened to InfoSec, is the practice of preventing unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction of information. The information or data may take any form, e.g. electronic or physical. Information security's primary focus is the balanced protection of the confidentiality, integrity and availability of data ... Many factors go into the decision of how to classify certain data. These factors include the following: Value: Value is the number one criterion. Not all data has the same value. The home address and medical information of an employee is considerably more sensitive (valuable) than the name of the chief executive officer (CEO) and the main telephone number of the company. Information Security and Compliance Software Why Tandem? It's all in the name. CoNetrix Tandem software is an online solution that helps ease the burden of regulatory compliance. Enterprise security architecture is a unifying framework and reusable services that implement policy, standard and risk management decision.
