What is reflexology? Reflexology is the holistic understanding, study and practice of treating points and areas in the feet and hands that relate to corresponding parts of the body. What are the Major Differences between reflexology foot maps? How come that various charts present different locations for body parts? It is quite hard to answer this question, because usually it is a bit of a mystery how the experts have developed their foot reflexology models! Welcome to BelArôme Learning - On-Line Classrooms!
