

Download The Sense Of Being Stared At And Other Unexplained Powers Of Human Minds

Rupert Sheldrake, a biologist and author, is best known for his theory of morphic fields and morphic resonance, which leads to a vision of a living, developing universe with its own inherent memory. Alfred Rupert Sheldrake (born 28 June 1942) is an English author, and researcher in the field of parapsychology, who proposed the concept of morphic resonance, a conjecture which lacks mainstream acceptance and has been characterised as pseudoscience. He worked as a biochemist at Cambridge University from 1967 to 1973 and as principal plant physiologist at the International Crops Research ... Since 1981, he has continued research on developmental and cell biology. He has also investigated unexplained aspects of animal behaviour, including how pigeons find their way home, the telepathic abilities of dogs, cats and other animals, and the apparent abilities of animals to anticipate earthquakes and tsunamis.
