

Download Toronto Streetcars Serve The City America Through Time

The Toronto streetcar system is a network of ten streetcar routes in Toronto, Ontario, Canada, operated by the Toronto Transit Commission (TTC). It is the second busiest light-rail system in North America. The network is concentrated primarily in Downtown Toronto and in proximity to the city's waterfront. Much of the streetcar route network dates from the 19th century. Streetcars or trolley(car)s (North American English for the European word tram) were once the chief mode of public transit in hundreds of North American cities and towns. Most of the original urban streetcar systems were either dismantled in the mid-20th century or converted to other modes of operation, such as light rail. Today, only Toronto still operates a streetcar network essentially ... Located in North America is a country famous for ice hockey, the Maple leaf, two widely-celebrated Justins (Bieber and Trudeau), and poutine. If I were to describe it in one word, however, I would say that it's diverse. The place is populated with people from all walks of life, from Asian and Middle-Eastern to European communities. As one might imagine for such a diverse city, Toronto is a mosaic of different neighbourhoods, most of them with their own identities and charms. Typically the west end of the city has been the hip part of town, but as rents rise and gentrification takes a firmer grip, it's the east end where the up-and-coming Toronto neighbourhoods are located. - Toronto Streetcars Serve The City America Through Time
